

The genealogy of Changura's wives could likewise be traced through his mother's father. A woman ascertains who are her potential husbands by going back to her mother's "tabular" father, or her mother's "alternative" father, as well as her father's father, from which point the pedigree is the same in principle as that of last paragraph. It is manifest, therefore, that whichever one of the four specific women which a man is allowed to take as a wife, possesses practically the same relationship to him, although through different channels. The lineage from which a man obtains his wife is decided by the elders of the tribe.
